User feedback summary

The overall functionality and user flow of the app were found to be appropriate . As the wireframes presented were in low fidelity, they did not include color or detailed visual design elements. Reviewers highlighted the need to focus on color schemes and visual aesthetics in the next stages of development to enhance user engagement and accessibility.

Some changes made

- Functionality to reset password and SSO(Single Sign On)
- Visibility of available WFH requests and upcoming holidays
- Removal of Cancel button from pages where both Cancel and X button were there to maintain design clarity
